EDUCATION

University of Colorado Boulder, College of Engineering & Applied Science Expected May 2028

B.S. Creative Technology & Design (CTD) & Music Technology

Selected Coursework: Design Foundations, Web, Games as Culture, Engineering Design Innovation

EXPERIENCE

CareerWise USA — Denver, CO Aug 2025 – Present

Associate Salesforce Developer & AI Specialist

- Work across product design, front-end, Salesforce, and AI on a white-label apprenticeship-management platform; currently own product design for its task and notification system, from dashboard cards, tags, and filters to full-page views and interaction states.
- Designed the course-replacement experience for training plans, including how course cards are organized and filtered, so a course can be swapped from start to finish.
- Turned stakeholder requirements into wireframes using Figma, Cursor, and Claude, then refined them into polished product concepts with my own design judgment and stakeholder feedback under tight deadlines.
- Implemented the design system from Figma into front-end code so designs match the live product.
- Mapped workflows across 10+ teams and 75+ employees, identified 8 shared pain points, and prototyped solutions for the product and internal tools.

Independent DJ & Event Audio Contractor Ongoing

- Performed 30+ sets at houses, bars, clubs, and pop-ups, including opening slots for Slickportal and Space Wizard.
- Produced audio for 15+ successful weddings, from the first client meeting through ceremony and reception sound, DJ performance, MCing, lighting, and technical setup.
- Coordinated in real time with couples, planners, venue staff, photographers, vendors, and guests, adjusting music, pacing, announcements, and technical needs as the event changed.

Pinnacol Assurance — Denver, CO Jul 2022 – May 2025

Technology Apprentice

- Designed interfaces, ran usability tests, and helped implement front-end and back-end work for internal business tools across product design, AI, data, and Salesforce.
- Built Vertex AI workflows with prompt engineering to improve consistency and automate data processing.
- Supported Salesforce development using Apex and Flows, and created internal videos and instructional content.

SELECTED PROJECTS & LEADERSHIP

3D Narrative Animation — Blender + Adobe Suite

- Created a short 3D animated film with multiple camera angles, pixel-art textures, editing, and sound design.

Asian Unity — Co-PR & Creative Lead, University of Colorado Boulder 2026 – Present

- Led visual identity and campaigns across branding, graphics, photography, social content, and video.
- Generated 140K Instagram views, 2.5K interactions, and 200 new followers in the last 30 days.
- Created a yearly campaign with a retro TV channel-flipping look, an incoming-transmission story, video, sound, and a coordinated logo reveal.

CU Rave Club — President, University of Colorado Boulder Present

- Led a 300-member music community and ran 6+ pop-up and collaboration events with venues and local artists.

CORE SKILLS

Product & UX:	Figma, interaction design, wireframing, prototyping, design systems, usability testing
AI & Prototyping:	Figma MCP, Cursor, Claude, OpenAI, Gemini, Vertex AI, prompt engineering
Development:	JavaScript, React, front-end implementation, Python, Apex, SQL, Git
Creative:	Adobe Creative Suite, Blender, photography, video editing, audio editing, live event production
