

AN TRAN

o.andy.tran@gmail.com | [linkedin.com/in/an-andy-tran](https://www.linkedin.com/in/an-andy-tran) | github.com/ondy-dev

TECHNICAL SKILLS:

- **Programming & Development:** Python, C++, JavaScript, React, SQL, DAX, Apex
 - **AI & Cloud Technologies:** Prompt Engineering, Vertex AI, Google Cloud, BigQuery, Gemini, OpenAI
 - **DevOps & Infrastructure:** Git, GitLab CI/CD, Docker, Terraform, Streamlit
 - **Design & UX:** Figma, Adobe Creative Suite, Sitefinity CMS, Webflow, Miro, Storybook
 - **Data Analytics & Visualization:** Power BI, Pandas, NumPy
-

PROFESSIONAL EXPERIENCE:

CareerWise USA – Denver, CO

Associate Salesforce Developer & AI Specialist

August 2025 - Present

- Engineer Salesforce applications with Apex, Flows, and Lightning Components, strengthening system reliability and scalability for national expansion.
- Deploy AI-powered tools (chatbots, personalized training plans, career pathway recommenders) to improve apprenticeship completion and user support.
- Redesign Hub interfaces and introduce gamification, boosting engagement and driving progress toward a 75% user retention goal.
- Lead AI governance and automation initiatives, including workflow efficiencies, staff training, and compliance frameworks across the organization.

University of Colorado Denver (Office of Research) – Denver, CO

Student Assistant

June 2024 - August 2025

- Rebuilt and optimized database architecture in Power BI, performing analysis and developing strategic visualizations for university research initiatives.
- Partnered with the Associate Vice Chancellor of Research to deliver actionable insights supporting institutional decision-making.
- Designed and maintained websites using Sitefinity CMS, enhancing accessibility, user experience (UX), and engagement.

Pinnacol Assurance – Denver, CO

Technology Apprentice

July 2022 – May 2025

• AI Software Developer

May 2024 – May 2025

- Built and deployed machine learning solutions using Google Vertex AI and Google Cloud, automating workflows and improving accuracy.
- Applied advanced prompt engineering techniques, reducing data errors and boosting operational efficiency.
- Led AI training sessions for apprentices and employees, strengthening team-wide adoption of new tools.

• UI/UX Product Designer

July 2022 – May 2024

- Conducted user research and usability testing, integrating findings into product design to improve business solutions.
- Applied AI-assisted design methodologies (Google Gemini, prompt engineering), streamlining creative workflows and increasing adaptability.

• Salesforce Backend Developer

July 2022 – May 2024

- Refactored and maintained legacy Apex codebase, improving performance, scalability, and reliability.
 - Leveraged pair programming and debugging strategies to resolve technical issues quickly and minimize downtime.
-

PROJECTS & LEADERSHIP ACTIVITIES:

AI Student Association – University of Colorado Denver, Denver, CO

Brand Strategist Officer & Intern Manager

September 2024 – May 2025

- Recruited and led a team of interns, completing high-impact projects including a React-based interactive website, improving user engagement and online visibility.
 - Developed and executed comprehensive branding strategies, leveraging social media to expand community reach and promote artificial intelligence education.
-

EDUCATION:

University of Colorado Boulder, College of Engineering & Applied Science

B.S. Creative Technology & Design (CTD) & Computer Science

Expected graduation May 2028

- **Related Courses:** Data Struct & Program Design, Object-Oriented Programming, Fund ENGR Design Innovation
